

OPTIONAL FORM NO. 10

Approved For Release 2002/08/28 : CIA-RDP71B00185A000100040073-9

UNITED STATES GOVERNMENT

Memorandum

TO : C/SMS

DATE: 19 July 1965

FROM : DAD/S&D

SUBJECT:

I would think that the Navy would have very stringent specifications in terms of materials for the antenna mast and that the option of cold-rolled vs. stainless steel would not rest in the hands of a contractor. You might like to check up on this. Everything matters, so that the corrosion, strength of the material, etc. would be significant features in the design, which would prohibit switching between the two materials.
